DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gough (US 6132425). In figure 8, Gough discloses a system for treating tissue within a tissue region using electrical energy, comprising a source of electrical energy; a first ablation device comprising a plurality of electrodes coupled to the source of energy and a second ablation device comprising a plurality of electrodes coupled to the source of energy in parallel with the first ablation device, whereby the first and second ablation devices can substantially simultaneously create first and second lesions, respectively, within a tissue region and a ground electrode coupled to the source of energy opposite the first and second ablation devices.
